

North Atlantic Industries certified to ISO 9001:2008 and AS9100:2004

North Atlantic Industries has been certified by Det Norske Veritas (DNV) to ISO 9001:2008 and AS9100:2004 for its Embedded Boards, Military Power Products, Motion Simulation and Measurement Instruments.

ISO 9001:2008 is the latest revision of the international quality standard, which provides a global reference for quality management requirements. NAI has been certified to ISO 9001:2000 since 2004, and has just recently been certified to the new ISO 9001:2008 standard, ensuring a commitment to continuous improvement in both products and services, assuring conformity to customer and applicable statutory and regulatory requirements.

AS9100:2004 is a widely adopted and standardized Quality Management System (QMS) standard for the aviation, space and defense industries. The AS9100:2004 standard was established by the International Aerospace Quality Group (IAQG) for the purpose of achieving significant improvement opportunities in Quality and Manufacturing processes. The AS9100:2004 standard has over 90 additional requirements of ISO9001:2000. These requirements focus on controlling and monitoring design, production, and purchasing processes. In addition, AS9100:2004 incorporates critical components of the MIL-Q-9858A specification.

The AS9100:2004 certification enables North Atlantic to assure not only our Aerospace customers, but all of our customers, that the quality of our products and manufacturing capabilities exceeds industry standards
