**NAI Achieves Latest AS9100:2009 (Rev C) Management System Standard for Stringent Quality Management Processes**

*Company Continues to Maintain Compliance with Defense and Aerospace Quality System Requirements*

**BOHEMIA, NY, March 27, 2012-- North Atlantic Industries (NAI)** is pleased to announce that on March 13, 2012, they attained [AS9100:2009 Rev C](#) certification and were recertified to ISO 9001:2008 as it relates to the design, manufacture and distribution of Embedded Systems, Rugged Military Power Supplies, and motion Simulation and Measurement Instruments for the Defense and Aerospace industries worldwide. The audit was conducted by Det Norske Vertas Certification, Inc. (DNV), a recognized independent auditing firm accredited under the Aerospace Registration Management Program.

ISO 9001:2008 is recognized by organizations worldwide as a quality management standard and is regarded as the most comprehensive body of standards on quality management systems and practices. The [AS9100 Rev C](#) has additional requirements in virtually every section of the existing AS9100 standards with the significant addition of risk management, project management, continuous improvement and on-time-delivery processes, with an enhanced focus on customer satisfaction. This certification affirms that NAI has thoroughly documented its quality processes while meeting the stringent qualifications for the global ISO 9001:2008 standard specifically within the Defense and Aerospace Industries.

Manager of Quality, Roger Maurizio oversaw the audit process which was conducted in December of 2011. “ISO 9100:2009 certification is a true testament of the continuous effort and commitment of our employees to produce superior products and customer service,” said Mr. Maurizio. “Achieving key certifications like [AS9100 Rev C](#) reinforces our commitment to our customers as a provider of reliable, quality solutions that can result in overall cost savings by reducing waste, inefficiencies and defects while improving quality systems.”

NAI received its first ISO certification in November of 2004.

*North Atlantic Industries (NAI) is a leading independent supplier of Embedded I/O Boards, Single Board Computers, Rugged Power Supplies, Embedded Systems and Motion Simulation and Measurement Instruments for the Military, Aerospace and Industrial Industries. NAI provides the highest quality COTS and modified COTS products in Commercial, Extended Temperature and Rugged versions. Information about NAI and its products can be found at [www.naii.com](http://www.naii.com).*
